- Mobile Technologies: React Native.
- Responsive Web Design.
- Version Control: Git, GitHub.
- User Interface (UI) Design.
- Problem Solving and Troubleshooting.

TOOLS:

Visual Studio Code, Chrome Developer Tools, npm.

WORK EXPERIENCE

Frontend Developer | Point2 Delivery Enterprise, Lagos, Nigeria | May 2024
- Single-handedly built the logistics mobile app and web app using React and React Native to simplify the booking of dispatch riders for both business owners and non-business owners.
- Created reusable components to ensure consistency and streamline the development process across both applications.
- Created a cost-calculation model that factored in traffic, solving a complex issue the startup faced.
- Implemented user-friendly interfaces and integrated real-time tracking features

Frontend Developer | Broadshift Technologies Limited, Lagos, Nigeria | October 2022 - June 2024
- Collaborated with other developers in building a bill payment mobile application using React Native.
- Managed the transition of the company's admin panel from PHP to React-Typescript.
- Collaborated with other developers in building a shift management system to manage the activities and daily reports for all staff on shift duties.
- Mentored and guided interns, fostering their technical and professional growth.

- Provided technical support to clients and end-users, resolving issues related to the company's web applications and endpoint integration.
- Participated in code reviews, providing constructive feedback to improve code quality and maintainability.

Freelance Software Developer | Self Employed | July 2022 - Present

- Developed logistic applications using React Native: for users and for riders.
- Implemented user-friendly interfaces and integrated real-time tracking features.
- Coordinated with backend developers to ensure efficient API integration.
- Created reusable components to ensure consistency and streamline the development process across both applications.
- Conducted thorough testing and debugging to deliver reliable and seamless user experiences.
- Designed and developed multiple websites for various clients using technologies such as HTML5, CSS3, JavaScript, React.js, and Node.js.
- Worked closely with clients to understand their requirements and deliver tailored solutions.
- Ensured all websites were optimized for performance, accessibility, and SEO.

PROJECTS

1. Bills Payment Mobile Application (React Native)
   - Spearheaded the development of a bill payment application using React Native for iOS and Android platforms.
   - Collaborated with cross-functional teams to design and implement features that enhance user experience.
   - Developed and implemented reusable components, enhancing the application's scalability and maintainability.
   - Implemented secure and efficient payment processing functionalities within the mobile application.
   - Created reusable components to promote code reusability and maintainability.
   - Integrated with backend services, ensuring seamless communication between the mobile app and server.
   - Conducted thorough testing and debugging to deliver a reliable and robust mobile application.

2. Logistic Applications (React Native)
   - Developed logistic applications as a freelancer using React Native: for users and one for riders.
   - Implemented user-friendly interfaces for both applications, focusing on ease of navigation and functionality.
   - Integrated real-time tracking features to monitor the location and status of deliveries.
   - Implemented user authentication and authorization for secure access to the applications.
   - Coordinated with backend developers to integrate APIs for data retrieval and updates.
   - Created reusable components to ensure consistency and streamline the development process across both applications.

3. Multi-Listing Hotel Booking Application (React, Redux, Node.js, Express)

- Developed a responsive multi-listing hotel booking website using React.js, Redux, Node.js, and Express.
- Implemented user authentication, search functionality, booking management, currency conversion, secure checkout, and role-based access control (RBAC) system.

4. Admin Dashboard for Multi-Listing Hotel Booking Application (React, Redux, Node.js, Express)
    - Built an admin dashboard using React.js, Node.js, and Express for efficient hotel, booking, and user account management.
    - Designed an intuitive interface and implemented features for analytics and user role-based access control.

5. Various Website(Freelance)
    - Designed and developed multiple websites for various clients as a freelance software developer.
    - Utilized a range of technologies including HTML5, CSS3, JavaScript, React.js, and Node.js to build responsive and dynamic websites.
    - Worked closely with clients to understand their requirements and deliver tailored solutions.
    - Ensured all websites were optimized for performance, accessibility, and SEO.
    - Conducted regular maintenance and updates based on client feedback and evolving needs.

CERTIFICATIONS
- Responsive Web Design - **FreeCodeCamp**
- JavaScript Algorithms and Data Structures - **FreeCodeCamp**
